EDUCATION

Texas A&M University

August 2022 – May 2026

B.S. in Computer Science, Minors in Mathematics and Cybersecurity GPA: 4.00

College Station, TX

- Dean's List, Cy-Fair Educational Foundation Scholarship Recipient, Honors and graduate-level coursework
- Relevant Coursework: Data Structures & Algorithms, Analysis of Algorithms, Artificial Intelligence, Cloud Computing, Cybersecurity Risk, Software Engineering

EXPERIENCE

TotalEnergies

Feb 2026 – Present

Data & Process Optimization Intern

Houston, TX

- Leveraged ML models to predict operational parameters (megawatt output and heat rate) for energy generation units, with outputs directly informing energy trading decisions
- Built end-to-end ETL pipelines integrating live weather APIs and AI-driven analytics to automate data ingestion, transformation, and dashboard refresh, eliminating manual reporting workflows and enabling proactive monitoring of system health metrics
- Designed and deployed interactive Power BI dashboards surfacing operational metrics across business units, enabling data-driven decision making for stakeholders across IT and data engineering teams

HMH

May 2025 – Aug 2025

IT Intern

Houston, TX

- Assisted in the setup, configuration, and maintenance of server hardware, workstations, and network equipment, ensuring optimal performance and reliability across enterprise infrastructure
- Built an automated log processing pipeline using Python and SQL to ingest, parse, and store 10,000+ license server records, automating system administration tasks and eliminating manual weekly reporting
- Designed and deployed an internal incident reporting system, improving issue intake workflow and increasing submissions by 23% while reducing mean resolution time

Computer Science & Engineering Department, Texas A&M University

Sept 2023 – Dec 2025

Teaching Assistant

College Station, TX

- Served as Peer Teacher for a Python engineering course and TA for C++ Programming Design and Concepts, mentoring 20+ students per semester in object-oriented programming and software design
- Led weekly lab sessions, evaluated assignments, and developed review materials across multiple semesters; strong written and verbal communication skills applied daily in student-facing and cross-functional settings

Outlier AI

May 2024 – July 2024

AI Training Contractor

Houston, TX

- Evaluated and ranked LLM outputs for mathematical reasoning and correctness, producing training signal data to improve Generative AI model accuracy for client deployments
- Reviewed final iterations of model responses prior to client delivery, contributing to a reduction in model errors to under 15%

PROJECTS & LEADERSHIP

Sapphire | *React, Next.js, Flask, GCP, Cloud SQL, Google OAuth*

Jan 2026 – May 2026

- Built a full-stack code modernization platform on Google Cloud Platform utilizing an LLM-powered translation and test generation pipeline; architected multi-backend system (two Next.js services and Python/Flask) integrated with GCP cloud storage, deployed end-to-end on GCP
- Designed the Cloud SQL schema, built REST APIs for database and storage operations, and implemented Google OAuth identity federation for secure, scalable user authentication

AI & Cybersecurity Research | *CNNs, RNNs, Random Forests, Python, PyTorch*

Jan 2025 – June 2025

- Investigated CNN, RNN, and Random Forest architectures for phishing detection and threat classification; built a modularized training platform on GPU-accelerated infrastructure to accelerate reproducible model experimentation and proof-of-concept evaluation

Interactive Piano Learning Web App | *React, JavaScript, Web Audio API*

Aug 2025 – Present

- Built a web app that teaches songs incrementally and evaluates user performance on pitch, timing, and note accuracy via real-time audio processing and feedback logic

BreakUp | *Aggie Coding Club – Agile Team Lead*

Aug 2024 – Dec 2024

- Led a 7-member Agile team building an AI-driven interactive game, owning sprint planning, design reviews, and code reviews; navigated ambiguity to deliver a cohesive, scalable system on schedule

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, Azure, GCP, Docker, Linux/Unix

AI & Data: Generative AI tools, PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, Power BI, Tableau, Excel

Languages: Python, Java, C++, SQL, JavaScript, TypeScript, HTML, CSS, Shell Scripting, Jupyter Notebook

Frameworks & Tools: React, Next.js, Node.js, Flask, Git, Figma, MPI
