EDUCATION

Texas A&M University

August 2022 – May 2026

B.S. in Computer Science, Minor in Mathematics GPA: 4.00

College Station, TX

- Engineering Honors program, Dean's List, Cy-Fair Educational Foundation Scholarship Recipient
- Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Artificial Intelligence, Discrete Structures, Program Design and Concepts, Cybersecurity Risk, Foundations of Software Engineering

EXPERIENCE

HMH

May 2025 – Aug 2025

Intern

Houston, TX

- Built an automated license server log analysis tool using Python and SQL, transferring results into a database and creating Power BI dashboards that automated weekly reports for over 10,000 log entries, streamlining monitoring with zero manual effort
- Designed and deployed a Power Apps incident submission app, enhancing usability company-wide, resulting in a 23% increase in incident submissions and faster issue resolution
- Tested and validated enterprise applications for Windows 11 compatibility, including packaging and deploying applications through company portal, gaining experience with software distribution pipelines

Outlier AI

May 2024 – July 2024

Contractor

Houston, TX

- Contributed to the training of certain Large Language Models (LLMs) by providing large sets of data to clients in order to increase the accuracy and correctness of responses
- Focused on the model's ability to solve various mathematical problems and reasoning-based prompts by identifying areas in responses where they did not meet expectations or provided false information
- Tasked with reviewing the final iteration of turn-based model responses before being sent to clients, resulting in model errors reduction to less than 15%

Computer Sci & Engr Department

Sept 2023 – Present

Teaching Assistant at Texas A&M University

College Station, TX

- Began as a Peer Teacher for a Python-based engineering course and currently serve as a Teaching Assistant for C++ Programming Design and Concepts course while mentoring students in object-oriented programming concepts
- Leading weekly lab sessions for 20+ students, providing guidance on semester-long programming projects and personalized feedback to facilitate learning software design, debugging, and project development
- Assisting in evaluating course assignments, explaining key concepts to ensure student understanding, proctoring exams, and developing review material

PROJECTS & LEADERSHIP

Research | AI and Cybersecurity

Jan 2025 – Present

- Researching the use of various AI models and algorithms (CNNs, RNNs, Random Forests) in cybersecurity for phishing detection and threat classification, conducting experiments with multiple architectures to study and improve prediction accuracy

BreakUp | Aggie Coding Club

Aug 2024 – Dec 2024

- Leading a 7-member Agile development team to build an AI-driven interactive game, coordinating sprint planning, design, and code reviews to ensure a cohesive and scalable gameplay system

SynthMining | Marketing Officer

Aug 2023 – May 2024

- Assisted in developing a platform that combines synthetic image generation and collaborative outsourced data mining to solve roadblocks in image-based data science

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks: React, Node.js, Flask, JavaFX

Tools: Git, VS Code, Power BI, Figma, Azure, AWS

Libraries: NumPy, Pandas, Matplotlib, PyTorch, MPI
